# Customised gourmet vending.

DIVA's interactive and intuitive touch technology interface simplifies users' purchasing process, turning it into a one and only experience. Consumers can use the 32" LCD touchscreen display to choose among 5 families of hot beverages (6 selections for each family).

An incredibly large choice, but with full assistance: a user guided system helps users along the entire selection process, from choosing their cup to completing their drink with delicious toppings and syrups. The software also provides useful nutritional details on every ingredient, in order to meet any particular dietary requirements.

With DIVA, users can dialogue with the machine and prepare customised recipes, for heavenly gourmet sensations.

## 01. Choose

Users may choose among 5 families of hot beverages (6 selections for each family) and between 2 cup sizes, also available with lids. It's also possible to set up 2 menus for quick access to a beverage category (favorites, best-selling, healthy, etc.).

## 02. Customise

Drinks may be customised and turned into a real recipe thanks to a selection of high quality toppings and syrups.

## 03. Let yourself be guided

The guided selection process of the graphical interface will provide users with a customised sensory gourmet vending experience.

# Consumers can choose from over 350 combinations of drinks and ingredients

DIVA pleases all tastes, with over 350 different drink combinations made from ground coffee, fresh milk and soluble products. Users can choose their cup size and decide whether to take their drink away thanks to practical lids: DIVA has been specifically designed for easy and satisfying on-the-go breaks.

Each drink can be customised by adding a number of top quality ingredients, such as: chopped nuts, chocolate flakes, choco pops, muesli, caramel or vanilla syrup and many other delicious flavours.

# Easy maintenance

Easy maintenance with DIVA: entirely designed to make it easy to access the inner parts of the system and clean them.

## MILK CIRCUIT CLEANING

Since milk is a perishable product, DIVA automatically washes the milk circuits to prevent bacteria proliferation: the circuit is rinsed with cold water each time after the milk has been dispensed. The system also includes periodical automatic washing (programmable from 0 to 20 minutes from the last time milk is dispensed) which cleans the dispensing circuit, with the option to heat the washing water with steam.

Cup station with 3 lifts to adjust the cup position according to the cup size.

# A tasty atmosphere

Thanks to its wide range of products and a system that diffuses the aroma of coffee outside the machine during the grinding process, DIVA seduces consumers by embracing all the senses and by creating an inviting environment and truly tasty atmosphere. Its innovative design and the use of top quality materials also make DIVA a luxury machine: its contemporary style, smooth lines and wide touch screen give lustre to an expressive and dynamic style.

Manual cup dispenser for different sizes (diameter from 70 to 80 mm Ø).

Yet there is even more: thanks to the LCD technology, high quality images and promotional or informative videos can be displayed, thus further enhancing consumers' involvement and offering business opportunities for product brand communication.

In other words, DIVA creates an incredible coffee shop experience in places such as motorway service stations, shopping malls, airports and cinemas, as well as offering a new office solution for large companies.

Lid dispenser.
